This open enrollment course is designed to provide a lively introduction to the history, concepts, material considerations, techniques and processes that are involved in the creation of large scale, monumental clay work and a progressive range off wheel–thrown and combined - process clay forms, made for daily use (cups, pouring vessels, lidded forms, baking dishes, bowls, plates, platters sets, etc.). Intensive review will explore concerns regarding sculpture, place, the figure, the body, utility, vessel, architectural applications, general presentation and indoor and outdoor installations. Students will mix their own clay bodies, slips, glazes Egyptian pastes, create texture boards and two - part molds, share shop responsibilities and fire their own kilns in the Cone 4, Cone 1 Cone 6, and Cone 10 temperature ranges. Lectures, demos projects, readings, exercises, individual and group critiques will encourage the capacity to collaborate, share ideas, develop critical awareness and a personal creative voice. Visiting artists, field trips TBA.

Offered with ARTS 429/529.003. In this course we will be learning Color Reduction Woodcut printing (using the same surface of wood, but carving away for each layer of color). We will be combining other relief printing mediums such as Collagraph (collage different textured materials to create a matrix, then print from it), Linoleum cut (carving linoleum surface, then print from it), Stamping techniques (Styrofoam), and silkscreen. We will develop our work beyond the traditional printmaking look to installations and contemporary scale of printmaking.

ARTS 389  Seminar: Bio Art and Design
Sec 012 CRN 48387 Polli  T  11:00-1:45  ART 304B (Lannan)
*Must take in conjunction with Bio Art and Design Lab ARTS 389.014. Offered with ARTS 429/529.012, ARTS 429/529.014, IFDM 491, MA 429, SUST 402, UHON 402, CRP 470/570, LA 511, BIOL 419/519. Bio Art is an art practice where humans work with live tissues, bacteria, living organisms, and life processes. Using scientific processes such as biotechnology (including technologies such as genetic engineering, tissue culture, and cloning) the artworks are produced in laboratories, galleries, or artists’ studios. In this studio course we will explore shared and new territory between synthetic biology, art and design. Students will gain a basic background in the tools and techniques of bio art and design including biomimicry and synthetic biology through hands on experiments, research into the work of other artists and designers in the field, cross-disciplinary collaboration and individual and group project development.

ARTS 429  Topics: Integrative Ecology and Social Transformation
Sec 002 CRN 37294 Banerjee  F  9:00-11:45  ART 304
Offered with ARTS 529.002. AMST 320, BIOL 402/502, CRP 470/570, GEOG 499, NATV 450, PADM 590, RELG 347, SUST 402, and UHON 402. The broad topics that will be covered in this course would include: the climate crisis, environmental and economic justice, Indigenous rights, and environmental conservation and sustainability. Simply stated, “ecology” is the science of connection. In this interdisciplinary and intersectional seminar course, we will explore varieties of connections that can be made across the environmental, cultural, social, economic and the political spaces and, across various modes of human inquiries, including arts, humanities, religion and sciences. The aim is to integrate knowledge and practices across disciplines, cultures and geographies—to apprehend, through reading, discussions, research and/or creative productions—the myriad social-environmental crises of our time, including the climate breakdown and the Sixth Extinction. Particular emphasis will be given to geographies going through rapid environmental changes, and how communities in those places, often in partnership with national and international institutions, are responding through a combination of resistance, resilience and revitalization initiatives. We will also discuss how recent scholarship in environmental humanities and ecologically oriented art criticism and history, in part informed by indigenous cosmologies and cosmopolitics and environmentalism of the poor, are challenging and changing the Anthropocene narrative and guiding the discussions toward a more just and sustainable Earth for all living beings. We will also discuss the two conferences convened by the instructor: Decolonizing Nature: resistance | resilience | revitalization in 2017 (http://decolonizingnature.unm.edu) and, the last oil: a multispecies justice symposium on Arctic Alaska and beyond in 2018 (https://thelastoil.unm.edu). Any UNM senior undergraduate or graduate student with a curious mind and willingness to work hard is eligible and is encouraged to take this class.

ARTS 429  Topics: Rehearsing the Self: Experiments in Narrative Writing
Sec 004 CRN 39121 Ho  W  5:30-8:15 + arr  ART 304
Offered with ARTS 529.004, FA 395 Topics in Arts & Community. In this course, we will explore modes of writing that cross and bend the boundaries between personal memoir, short essay, poetry, visual art, and criticism. Authors we will discuss include Claudia Rankine, Paul Chan, Carmen Machado, Durga Chew-Bose, Maggie Nelson, Anne Carson, Saidiya Hartman, Fred Moten and Stefano Harney, Layli Long Soldier, Lydia Davis, Eileen Myles, Leah Lakshmi Piepzna-Samarasinha, LTTR, and others. Moving from the premise that the personal is political, our conversations will delve into the ways in which experimental forms within language and art can enact spaces of liberation and resistance. Students will workshop and develop written/visual works throughout the semester. This course is open to students from all disciplines.

Course Fee: $52.50

Sec 001  CRN 46167  Harris  TR  9:00-11:00 + arr  ART 304  
Offered with ARTS 542.001, LA 512, ARCH, CRP. Sculptural Infrastructure engages sculpture in the public realm around infrastructures. Infrastructures in the 21st Century range from traditional water, sewer, energy, to non-traditional, communications, broadband, policy, free-trade, etc. This semester, the class will take on three projects with clients. We will work with the Sevilleta National Wildlife refuge prototyping a new installation engaging with the climate variability experiment newly rolling out over five years on the Refuge. This project will focus on modeling climate change and water collection to a visiting public. With the City of Albuquerque and community members, we will be prototyping a comfort station installation for the city to provide public water and toilet facilities powered by solar power, picking up where last year's Sculptural Infrastructure left off with a public solar-powered charging station. And during the semester we will be working with an ongoing garden installation at the Albuquerque Museum “the birds arrive” begun with Land Arts of the American West and Intermediate Art and Ecology this Fall. We will welcome other classes into our collaborations. Students should be prepared to make quickly, develop ideas with stakeholder participation, and work as a collective.
