The Art Department offers BFA, BA and BAIA undergraduate degrees in Studio Art, the BA and a Post Baccalaureate Licensure in Art Education and a BA in Art History. The MFA degree is offered in Studio; an MA can be pursued in Art Education; and the MA and PhD degrees are possible in Art History. In all of the work leading to these degrees, the importance of the arts as communication, in the past, the present and the future, is pivotal. This belief is the cornerstone of our programs, and it is the foundation for our primary goal, which is to expose students to the richness of art through a wide range of new and traditional media. We also seek to develop critical thought in our classes, and the practice and methods for understanding the teaching of the arts and the history of art.

The Department is dedicated to providing the best education possible no matter what degree a student might be pursuing. The Department is dedicated to benefiting UNM, the city of Albuquerque, the state of New Mexico, as well as national, and international communities. To achieve these aims, the Department is committed to maintaining a world-class faculty that is actively engaged in creative art, art education, and art history.

Offered with ARTS 529.004. This advanced level course is research and production driven. We will examine textiles as technology in an investigatory manner across the long arc of textile design and creation throughout various histories and cultures. How might researching one of the earliest forms of human technology inform our artwork's ability to respond to the concerns of our times? Topics for weekly investigation and projects will be student-driven and responsive, including but not limited to the following: textile design, textiles as language, as architecture(s), wearable art, conceptual clothing, conceptual fashion design, soft sculpture, dyeing/ printing/manipulation of textiles, traditional arts in contemporary contexts, costume and regalia for performance and ritual, interactive textiles, installations and immersive environments, vernacular textiles (flags, banners, napkins, rugs) as art, and more. Throughout the semester experiments in textile methodologies (dyeing, sewing, laser-cutting, 3-D printing) will be integrated with theoretical ground-work in critical visual, queer, and race studies as well as with visiting artists and off-site visits to gain experiential knowledge of textiles in action.

Offered with ARTS 544.004, CE 491, CRP 470/570, LA 511, SUST 402.002, UHON 402. This course meets for 16 weeks. Creating Change is a team-taught, multi-disciplinary course about how art and design can respond to the difficulties we face globally and locally. As our climate changes, our information systems are compromised, our water supplies dry, our political systems remain in gridlock, and our world becomes paradoxically less connected to our physical existences and environments (despite becoming more connected virtually), we ask: what role do artists and creative agents have in envisioning alternative futures? This course embraces practices from both applied and fine art and design to establish a laboratory for creating positive change. In the face of crises, we invite a future that is connected, sustainable, creative, and changing. A series of three intensive modules led by faculty from the Art & Ecology area will offer students the skills of collaboration, communication, learning through a community process, developing a site-based plan of action, and addressing economic value and sustainability. Students will have the opportunity to travel to existing project sites throughout the region to work closely with practitioners in developing alternate models in infrastructure, economics, food production, and narrative.
