The Art Department offers BFA, BA and BAIA undergraduate degrees in Studio Art, the BA and a Post Baccalaureate Licensure in Art Education and a BA in Art History. The MFA degree is offered in Studio; an MA can be pursued in Art Education; and the MA and PhD degrees are possible in Art History. In all of the work leading to these degrees, the importance of the arts as communication, in the past, the present and the future, is pivotal. This belief is the keystone of our programs, and it is the foundation for our primary goal, which is to expose students to the richness of art through a wide range of new and traditional media. We also seek to develop critical thought in our classes, and the practice and methods for understanding the teaching of the arts and the history of art.

The Department is dedicated to providing the best education possible no matter what degree a student might be pursuing. The Department is dedicated to benefiting UNM, the city of Albuquerque, the state of New Mexico, as well as national, and international communities. To achieve these aims, the Department is committed to maintaining a world-class faculty that is actively engaged in creative art, art education, and art history.

ART & ECOLOGY
Art & Ecology is an interdisciplinary, research-based program engaging contemporary art practices. Graduate & undergraduate students develop land and cultural literacy with a conceptual foundation and a wide range of production skills, including sculpture, performance, analog & digital media, & social practice.

EXPERIMENTAL ART + TECHNOLOGY
Experimental Art & Technology at UNM is an interdisciplinary experimental program within the Department of Art. The program fosters an atmosphere of radical creativity & thoughtful engagement with emergent & established technologies. Students are expected to make work that comments on, engages with, & expands our notions of what technology based art can be through courses that explore high tech immersive environments alongside consumer electronic hacking & simple analog circuit building. Labs are equipped with industry standard software as well as free open source analogous software options. Studio production is coupled with critical inquiry into the relationship between art, technology, politics, society and culture.

ART PRACTICES
Art practices interdisciplinary curriculum is structured around thematic units, introducing students to the conceptual issues that all artists must consider. In each of these units, studio assignments and readings are designed to expand students' understanding of fundamental ideas by exploring new and unexpected approaches. These themes include light, frame, mark, motive, change, and time.

CERAMICS
Ceramics at the University of New Mexico supports the development of diverse personal visions, ranging from utilitarian pottery, vessels, objects, sculpture and installations, to site-specific works and community-based, art-as-social initiatives. Special emphasis is provided in the time honored traditions of Pueblo Pottery, which are explored through field based research and studio engagement.

PHOTOGRAPHY
The University of New Mexico's photography program was one of the first MFA programs in photography in the country, awarding its first degrees in 1968. Under the direction of Clinton Adams, who served as the Dean of the College of Fine Arts from 1961-1976, the photography studio art and history of photography programs began to take shape at both the under-graduate and graduate level during the 1960s. The University Art Museum's collection of photographs grew substantially under the leadership of Van Deren Coke, who was hired to be the chair of the Art department and the first director of the museum in 1962; the museum now maintains one of the most significant collections of photographs housed at a public university in this country. Beaumont Newhall, photo historian and author of the seminal textbook The History of Photography, was hired in 1971, and contributed significantly to the development of the graduate program in the history of photography.

PAINTING AND DRAWING
The Painting & Drawing area's reputation is founded upon its deep commitment to personal expression, experimentation, & risk taking, while remaining rooted in the fundamental understanding that painting & drawing are unique in their history & methodology. Painting & Drawing at UNM has a long & important history in American Art, including both faculty & alumni. During the 20th century, artists such as Raymond Jonson, Florence Miller Pierce and the artists making up the Transcendentalist Painting Group were deeply connected to UNM, & artists like Richard Diebenkorn & Agnes Martin have been associated with the school. Close connection to Native American & Hispanic fine arts traditions energizes the European traditions of into the 21st century.

PRINTMAKING
Printmaking is the historical frame through which all artistic media are still referenced. The UNM Printmaking Area has a strong national reputation & attracts many students to both its undergrad and grad programs. Many of our former grad Printmaking students are now teaching in various universities & leading contemporary Printmaking into the next generation. The Printmaking Area has offered over one hundred community outreach projects and has collaborated with many different groups, including public schools and non-profit organizations, both nationally and internationally. There is a large group of printmakers in the Southwest and the UNM Printmaking Area serves an important leadership role to this group.
SCULPTURE
The sculpture programs at UNM offer an exciting and diverse choice of approaches toward working three-dimensionally. Options include techniques in woodworking, metal fabrication and casting. Additive and subtractive processes in hard and soft materials as well as innovative approaches to installations and site-specific works are also included in our curriculum.

ARITA PORCELAIN VESSELS PROGRAM
The Arita Porcelain Vessels Program introduces UNM students to traditional creative processes from Arita, Japan that have evolved over the past 400 years. Students practice ‘art as a way, not a thing’ resulting in layers of creative practice within each porcelain form. This handmade ‘true porcelain’ is the most durable ceramic, with glaze colors becoming brilliant and translucent after the firing. Students create functional works reflecting a unique aesthetic from this time and place, with the connection to a living art.

SMALL-SCALE METAL CONSTRUCTION AND CASTING
Is offered at all undergraduate levels each semester. Levels I and II are devoted primarily to fabrication/construction processes in silver, copper, and brass. Included are such techniques as soldering, forming, coloring, and various finishing processes. Level III concentrates on lost wax casting in bronze. Lectures and demonstrations on brazing may also be offered. At the advanced level, the student essentially writes their own program through discussions with the instructor. Emphasis is on form generation as it relates to intimate scale.

LAND ARTS OF THE AMERICAN WEST PROGRAM
Is a semester-long travel & place-based arts pedagogy. Students in Art & Ecology have the opportunity to work on various collaborative & interdisciplinary projects with departments across UNM & on comprehensive thesis projects integrating community, ecological, and aesthetic research.

GRAPHIC DESIGN CONCENTRATION
UNM Art's Graphic Design concentration provides students with an opportunity to expand upon their fine art studio practice through the integration of design thinking, visual communication, and commercial application.

ART HISTORY
The art history program emphasizes the study of visual art as a means of understanding the intellectual and cultural history of humanity. The program provides a firm grounding in global art history within the context of a liberal arts education. Undergraduate work covers the broad range of art history leading towards graduate work for the M.A. and the Ph.D. degrees, organized into two major concentrations: Art History and Arts of the Americas. The curriculum in each area of concentration is nationally and internationally recognized.

Art History Concentration - The concentration in Art History encompasses the entire field of art historical studies and is grounded in a cultural analysis of artistic expression. A broad variety of objects are explored, ranging from the traditional fine arts to popular and innovative media. Such contextual approach and wide-ranging theoretical frameworks together with more traditional studies of style, iconography, and medium, illuminate the visual arts within the intellectual and cultural history of humanity.

Art of the Americas Concentration - Arts of the Americas brings together the arts of pre- and post-contact cultures of North, Central, and South America. Integral fields of specialization include Meso-American, Central and South American art, architecture and performance arts, ancient and modern Native American arts, Spanish Colonial art and architecture, and nineteenth through twenty-first century Latin American arts. This concentration promotes the study of continuity and discontinuity in the history of art and architecture in the Americas.

ART EDUCATION
The Art Education Program prepares art education professionals to meet the needs of diverse populations in schools and community-based centers in the state and nation. The undergraduate and graduate art teaching programs educate students toward becoming reflective art professionals who can encourage students and clients to create their own artwork in response to their life experiences in our visually complex society. In addition, as future teachers students learn how to teach about art in varied cultural contexts using best teaching practices.

ARTS 429  Topics: Survival Skills for Artists  
Sec 016 CRN 55698  
Ho  W  5:30-8:15  ART 304  
(3 credits) Offered with ARTS 529. This course is designed to investigate what it means to be a practicing artist under late capitalism: the course will give students the practical skills necessary for survival, while also delving into ways that cultural producers are actively subverting capitalism and building alternative futures. Being an artist under late capitalism goes beyond making your work (the fun part); it also requires understanding many aspects of accounting, graphic design, communications and marketing, administration, and expanding your network. We will cover skills such as talking to curators, self-promotion, funding your projects, budgets, building your web presence, and doing your taxes. We will hear from guest speakers who are practitioners and experts in their fields, who can give students hands-on advice. Our aim is to demystify the processes and skills that are integral to being a professional artist while also planning for the fall of US racial capitalism.

<td>(3 credits) Share Space is a research-driven course that will provide a space for shared learning and experimentation. The class entails studio work, shared readings, critical conversations, exhibitions, cross-disciplinary conversations, and presentations. The course's primary focus is to create a space where we can bounce ideas and theories off of each other as it pertains to your visual lexicon, music, literature, theater, film, cooking, agriculture, psychology, politics, and so on. The discourse in the class is not bound to Fine Arts but serves to be a space that analyzes how experiences within our everyday lives impact how we interpret the world through Art.</td>
